

- * Q1 Write down the Linear Search Algorithm using function and display the array.

- * Q2 Find the position of element 33 using binary search method in an array given as:
 {5, 11, 17, 23, 29, 33, 41, 48, 52, 60}

- * Q3 Write down the Binary Search Algorithm using function and take user-defined array and search key.

- * Q4 Sort the following numbers in ascending order using Bubble sort.
 Number : {15, 16, 6, 8, 5} and write the output after each iteration.

- * Q5 Write down the Bubble sort Algorithm using function and take user-defined array and display.

- * Q6 Sort the given data of array using selection sort.
 70, 10, 20, 5, 30 Show each iteration properly

- * Q7 Write down the Selection sort Algorithm using function and take user-defined array and display.

- * Q8 Arrange the given numbers in ascending order using insertion sort.
 Numbers: 77, 33, 44, 11, 88, 22, 66, 55

- * Q9 Write down the Insertion sort Algorithm Using function and take user-defiend array and display.

- * Q10 Write down the Quick Sort Algorithm Using function and take user-defined array and display.

- * Q11 Write down the Algorithm for insert and element in the array.

- * Q12 Write down the merge sort Algorithm using function and take user-defined array and display
